MAIN FAULT Cannot duplicate complaint. Rifle operates properly, however, disassembly of rifle reveals the trigger assembly has been adjusted outside factory (evident missing from adjusting screws - 1/16" thick, will measure over our next spec (at 6 1/4"). 2) insufficient over-travel
Sear lift - .011"

ARTS	COMMENTS Offer to re-adjust and re-sal present trigger assembly, or, if owner desires, we can install a new trigger assembly at a nominal cost, as a gesture of good-will, if it should better restore confidence in the rifle.
