Remington Arm Maintenance
and Repairs Dept.

Dear Sir/Madame,

I'm sending this rifle to you for the following safety problems that raised my concern; 1. The gun accidentally discharged when I shifted the bolt safety from SAFE position to FIRE position. Without even my finger near the trigger. Incident happen last hunting season 2001 during hunting. And for this safety problem I never went hunting for the rest of the hunting season. 2. I also noticed that the trigger pull became light and sensitive to very light touch of the finger.

Please call me at this home phone number (914)793-7531 at 9:00 or leave your message with my wife. My working hours is after nine to five thirty.
