

Jim Stekl

IN JAN 90 I HAD

The Model 7 Loaded AND
when I Took the safe
off It Discharged

I thought coming from
A warm place to a cold
Place caused this so I
Just Ignored this

Than Nov 15th while
Deer hunting my wife
was Back Posting and
she took the safe and
moved it forward and
the Rifle discharged and
Almost shot our son
Thats when I knew

For Sure the gun was
Very UNSAFE

she was so upset
she threw the rifle down
on the ground AND started
crying

So. I'm returning
this and hope you
can solve the problem
