1126 BUCHANAN ROAD  
KAUKAUNA, WI 54130  
(414) 766-2257

Remington Arms Co.

Attn: Jim Stekl

This rifle has been a problem for the last several years. It has mis-fired several times when the customer has had a deer in its sights, I don't know why the customer hasn't gotten rid of it as I would have. When the mis-fires happened, the rifle had been looked at by a gunsmith and the last time; the firing pin spring was changed. Also, the trigger was also changed per the recall, thinking this was causing the problem. As I told you over the telephone, this last time, the rifle fired after taking the safety off, which I thought should have corrected when the trigger was replaced. Could you please check the complete rifle over please, thank you, I would like to also add that the trigger was adjusted to finish out the deer hunting season.

Also, in the carton, is a 280 Rem. round which did not fire. This happened also when the rifle had a deer in its sights, and caused the customer to not get the deer.

Thank you,  
"Dave"
