Dear Remington Service Dept.

I bought this rifle about 1 1/2 years ago. Last year when I tried to sight in the rifle it would drop the firing pin upon closing the bolt it would also fire upon taking the safety off. I took it to the Williams Gunsmith on Cole Road in Saginaw where I bought the rifle and told them of my problem they said they knew what the problem was and said it would be fixed. I picked the rifle from them brought it home and sighted it in again and it seemed ok. Now this year I took it out to sight it in and the firing pin dropped a couple of times upon closing the bolt I did not have it fire taking the safety off but the trigger pull is so light I am afraid to use the rifle. I talked to a fellow from your service dept told him about it. He said I should send it back to you for repair.
