Arms Service Division
14 Hoeller Avenue
T Lion, New York 13357

Sirs:

I have enclosed a Remington 700 in 300 mag. When you push safety off the gun will fire. Something is broken inside the trigger. I would like to have the gun fixed. I called the service department at Remington they informed me that there had been a recall on some of the 700's for trigger problems. If this gun is not covered under recall, fix it and send it back to me C.O.D. through U.P.S. or write or call me and I will send the money for cost of repair.

Thank You.
