DEAR SIRS

I WAS informed by a friend that Remington ~~Arms~~ ARMS HAD issued A recall ON ALL model 700 rifles. My rifle has served me well, however From time to time it will fire when releasing the SAFETY. It scared me so bad the last time I will not hunt with it any more. IF there is any way possible I would like for your experts to look at my gun + see if the problem can be corrected. I'm not sure how to go about returning my rifle to you. I've owned this rifle for some time + no longer have the box it came in. IF you could contact me + let me know what I should do I would appreciate it A lot.

THANKS

DAVID EASTER
