

Pat

Here is my rifle as per your instructions on the phone. It's been a while since I've used it because of its problem so I'm not sure if the rifle went off when I worked the bolt or the safety. It has done this enough times to make it unsafe, so I've had it sitting in my gun case until I could find someone to cure the problem.

I appreciate you taking an interest in this and what ever you can do will be appreciated.

Thank You Very Much
