Breen

Dear Remington Arms Co.

On May 22. 1994 I saw an interview with a man on 60 Minutes that had his foot partly shoot away buy his Remington model 700 rifle. This brought back bad memories to me, because I also own a Remington model 700 serl. # 6672072 that has less than 100 rounds through it. This rifle has gone off twice on me, once as I locked the bolt down and once as I took off the safty. These both happend within three weeks of each other in September of 1992.

I take very good car of all my guns and beleave ther is a bad problem with this one . I really liked this Rifle and would like to shoot a Remington again, but even if you said you could fix this rifle I could not shoot it. Ihave not shoot this rifle sence September of 92.

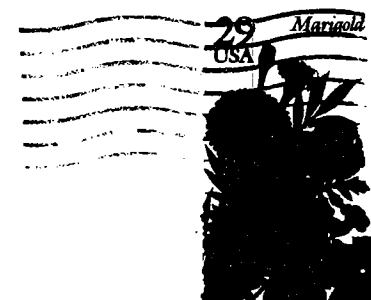

Please contact me on this matter as soon as possible.

Sincerely, Concernd!!!
