

# Remington.

## Repair instructions

Model Number: 660

Serial Number: 111156

Are you the original owner?: ☒ YES ☐ NO

Name: Ron Ford

Date of Purchase: 1971

Address (No PO Boxes): 602 E. Rusk St.

City: Marshall

State: Texas

Zip: 75670

Phone (Daytime):

Fax:

E-mail Address:

Please describe your problem: Sometimes the rifle will fire when taken off safety, without touching the trigger. This almost caused a fatal accident the first time. Since it was in someone else's hands, I thought he must have pulled the trigger inadvertently. It has happened to me on two other occasions. Also, the trigger guard piece has always been a shoddy looking fit. (seems to be made of plastic). If it could be replaced with metal I would appreciate it. Please check riflings also.

### Ammunition Information:

Manufacturer: Remington

Type: 150 gr. soft point

Serial Number:

1 1 1 1 5 6

Model: 660

RE00032136

Sear barely moves due to sticky residue build-up, TA extremely dirty, Install new TA, clean action, check over completely at  $\frac{1}{2}$  normal charges.

FCS 9/17/01

How often do you lubricate the trigger assembly? (Months or Number of rounds) 12 mo.

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? YES ☒ NO

Comments: Seems to be a very accurate rifle. I am looking forward to many more years of service from it.

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith? Never

What were the services performed?

Thank you,  
Ron Ford
