Dear Sir;

I purchased one of your rifles
a model # 700-30-06 serial no C6310521
in good faith and now find it has
a defect in the safty.

Last season sighting on a buck
and took it off of safty & it fired
without my finger on the trigger.
The buck bolted & it scared the
heck out of me. Since then I found
out a person had shot himself
in the foot this way.

I live in Prineville Or. and
would like to get it repaired as
close as possible.

Please send any drawings
and authorizations to get it repaired

Thanking you I remain
