Remington Rifle

Gentlemen:

Recently I had an incident to happen in my home that upset me terribly. I took my 222 rifle out of the locked gun cabinet, placed a shell in the gun and before I knew what had happened it fired without my touching the firing pin. Last year I took this same gun to Meridian to Sanders to have it worked on because it was misfiring and he thought it was fixed. After this happened in my home, I called your company and was told to take it back to Sanders for repairs. After Mr. Sanders looked at the gun, he stated that he had received a letter from your company to have the gun mailed back to them for repairs.

I do not want the gun back as is. I have children in my home and have family members who hunt with this gun. When the gun discharged in my home, it blew a hole in the ceiling and the roof and could have easily killed some of my family. I would like to have a 22-250 rifle put in the used stock of this rifle instead. If you need to talk to me about this, you can call me at (601) 743-5443 after 5 p.m. or at work at (601)743-2641. Or if you prefer, write me at the address above.

I am sure that you can understand my feelings in this matter. We are all in agreement that this gun is unsafe in its present condition.

Sincerely,

*Billy Joe Hedgpeth*
