

To Whom it may Concern

This Rifle has something wrong
with the Trigger Assembly.

My son and I where at the shooting
range when the problem started. The
safety got stuck on the rifle. My son
whent to eject the shell in chamber
the rifle discharged

I took it to a gun smith
he fixed the safety lever then the
trigger woodent pull he went to
adjust it and two pieces of mangold
metal fell off out of the Trigger Assembly.

Thank You
