Dear Sir;

I read an article in Field and Stream about upgrading the safety on the Model 700. I have the older style that does not allow me to open the bolt without taking the safety off, and would like you to upgrade my safety. I have experienced two accidental discharges with this rifle, while opening the bolt. Please go over it and fix whatever is wrong. (Ser. No.: A6459623)

Charge my credit card for any parts and services charges.
