

## Problem

When it's very cold, I'll take  
The safety off AND sometimes  
it will fire AS you ARE moving the  
safety off. Also the pull on the  
trigger Doesn't seem to Be the  
same each time. I sent the Bolt  
Along I Didn't know if you needed  
it. I think it needs a new  
trigger mechanism.

Payment you CAN call me AND  
we will run it though on  
the credit card OR you send  
the Bill back to me. I would  
prefer the fastest of the two.
