

To Who It May Concern

As A hunter I"m greatly concern about safety and while hunting last fall with my brother I went to eject a bullet up in the chamber, and has I was pushing the bolt in place the gun fired. This gun haven,t had four boxes of bullets fired through it.

This was a terrifying and frightening experience lucky ~~that~~ that there wasn,t anyone hurt.

After returning home , while cleaning the gun, I pulled the bolt back and push it back in place again , and the firing pin went again. This happen a number of times.

After this experience I"ll never feel comfortable using this gun again, so I"m asking if your company would be so kind as to REPLACE OR REFUND this gun with a different model thank you.
