MAIN FAULT

*While the safety is in the on position it can
be moved just a fraction. When this happens
the bolt opens and fires the gun.**Date of Mfg. 12/79. Tried safety in all positions pulled to
Could not duplicate customer concern. Trigger has been on
outside of the factory and gear engagement changed. Ex
trigger assy at a special price as a gesture of goodwill
and to restore his confidence in the rifle.
We do not recommend that the trigger engagement
be changed from the factory setting.*
