☐ MARRED

CUSTOMER'S REQUEST

*The rifle jams when the bolt is closed.*

MAIN FAULT

*None found - cannot duplicate complaint. Trigger assembly and safety operate properly. Trigger pull 4 1/2 pounds, rear-act .008". Trigger assembly is contaminated with dirt & partially dried oil, however, and in cold conditions could possibly cause a problem.*

PARTS

*Offer to clean present assembly, if possible, or we can replace trigger assembly at ~~customer's expense~~ to normal charge, if it will better restore confidence in the rifle, as a gesture of good-will.*
