Amsterdam, OH 43903

May 13, 1999

Dear Sirs:

I am returning a Remington 541X - 22 Cal target rifle that was purchased by the Steubenville Rifle Pistol Club for the Jr. Shooting Program under the Civilian Marksmanship Program.

A total of five of these guns were purchased on June 11, 1998 from Port Clinton, Oh, the CMP Headquarters.

Upon opening and inspecting the guns, they were taken to the club so they could be sited for the Jr. Members of our club. The instructor removed the clip and then loaded 3 rounds into the clip and then inserted the clip into the rifle.

The round apparently fired while the bolt was being closed in the chamber.

The brass case apparently exploded causing damage to the bolt and clip. The enclosed yellow box contains the broken pieces.

Although there were no serious injuries, the instructor was stung on the R wrist and forehead by pieces of the exploding parts.

I would appreciate a complete inspection and repair of this gun as it will be used by members of our Junior Club. You may contact me at 740-381-4250 if you have any questions.

Sincerely,

Fred Jones  
President, Steubenville Rifle Pistol Club

P.S. Are metal clips available for this gun as the plastic ones seem to be inferior?

OUR CLUB ALSO WANTS TO PURCHASE ANOTHER STOCK, VIEW NO. 44 ON  
PARTS LIST PART NO. 14514 STOCK ASSEMBLY.
