

Remington Arms

While ago I called you about a bolt for a model 788 Remington rifle.

The rifle fired as the bolt was being closed but not yet locked blowing the cartridge case to pieces.

Upon trying to chamber a new round it did it again. What was left of the case was difficult to get out of the chamber.

Trying to close the bolt with an empty chamber the handle broke off.

I was told to return the rifle to you for exchange and you would notify me as to conditions.

Enclosed is the rifle and you can reach me at 715-762-2553
