To Remington Arms Co.  
Att. dept. A

The enclosed rifle. serial# B6417395. 7mm Remington Modle # 700 ADL is malfunctioning. Sometimes when the action is locked down, and a round in the chamber, flipping off the safty will cause the rifle to fire. (WITHOUT TOUCHING THE TRIGGER). ALSO. sometimes the rifle will fire when locking down a live round in the chamber. (as the bolt is operated down to the locked position). Both of these problems are getting worse. Please Repair and return to me at the address above. If there are any problems or questions please call me

Thank You.  
Mark E Jackson
