Dear Sirs:

I am returning this rifle
model 700 BDL (LH) Ser. # A 666 5006
and Leofold Vari X III 3.5-10 Scope.
for the following reason:

I find that when working the
bolt that it sometimes does not
cock the firing pin when it should.
This past hunting season when doing
this (not cocking the firing pin) it
accidentally fired a round. Please
check to see if there is a problem
with the bolt. I was not touching
the trigger when this happened.

Please correct and return.

Respectfully
Jens F. Jorgensen
