Dear Sir,

I own a 8MM Rem. mag.  
model 700 serial No. A6472564.  
There was a T.V. program on  
60 minutes that claimed this  
700 Remington has a serious flaw  
in it which the rifle fires  
without the trigger being  
pulled. I have had on two  
occasions where the rifle fired  
when I went to take the  
safety off and left the bolt  
to take out the bullet from  
the magazine barrel. Can you  
give any information you have  
as to the safety of this gun.

Sincerely,

George A. Keto
