

Remington Arms Company

I bought this gun in the early 1980's. I have killed a few deer and some ground hogs with it. I was unloading it and it went off, blew a hole in the ground between a guy and myself at our feet. I put the gun up in the closet until I read that it could be fixed. I like the gun but was afraid to use it any more. I have bought a 700-243 Remington and a new 7 m. magnum; they are O.K.
