CUSTOMER'S REQUEST

"Don't shoot when trigger is pulled all the time. Set it down and it goes off."

Cannot duplicate complaint. However, firing pin fall is slow, because trigger assembly is contaminated with sticky residue - an empty cam is sticking to trigger assembly with plates - will not properly maintain trigger pull 3 1/2 pounds, as left to 4.5. Factory adjustment has been removed from all adjustment screws.

Send quotation for new trigger assembly at 3 normal price, as getting good with.
