

Jan. 10, 1995

To whom it may concern:

I spoke to someone yesterday regarding my gun (Remington 270 model 700). In response to the conversation, I am sending the letter to inform you of the problem. The gun goes off at times it is not supposed to! When I close the bolt and when I kick the safety off.

Your representative told me if I would let you know what the gun was doing, you could repair it and return it to me.

Thank you in advance for your help.
