Remington Arms Co.

14 Hoefler Ave.

Elion, N.Y. 13357

To whom it concerns:

I am returning my rifle for repair, ^{on replacement} the problems are as follows.

Twice with the chamber loaded, out in the field, I put the safety on off & it has fired a bullet at the time.

On several occasions I have put the safety on off & pulled the trigger & it has only clicked. Then when I start to pull the bolt up it has fired on me at that time.

These problems don't happen every time but do happen at random. I have had the gun about 20 years. ^{During} After these incidents I have very seldom used this gun & acquired another T.M.M. rifle that I have used the last 10 years.

Hope to hear from you,

Darwin J. M. Sarty
