Dear Remington,

I am the owner of the
Remington 30.06 Bolt Action model 700
rifle in this box Serial No. #178249.

I'm sending you this gun to be
looked at, because of a incident that
happened, that should not of happened.

Up North in November of 1993 I was
deer hunting with my family, went
out in morning to hunt and returned
to cabin @ 10:30 AM when I went to
take the safety button off to release
the bolt to unload it, when all of a
sudden the gun discharged, thank-god
I had sense to point the rifle in
the air while I unloaded it. Otherwise
we may have had a tragedy.

P.S I seen the special on
this gun on 60 minutes, before the gun
discharged on me.

PLEASE find out what caused
this and fix so it doesnt happen again.

Thank-you so much
James W Marchese
