700

Dear Remington Arms Co.

I have a problem with a model 700 bolt action. serial no. 6625396, it FIRES when I push the safety from ~~Safe~~ to Fire without pulling the trigger. I have been told that I must send it to you. Please tell me how and the cost.

P.S. If you pull trigger while on safety - it will fire when you push off safety without pulling the trigger

Thank you for your help.
Gary
