To Whom It May Concern,

I have sent this 700ML back because when I was sighting it in this year I had it on safety, closed the bolt and it fired. The broken part is in the bag. I have called you and the Consumer Protection Division of the State Attorney General. In my conversations with the factory they offered a quick fix to get me back hunting. Now I will miss this season. I have most of the model 700 collection, the wingmaster 870, Remington 1100 shot guns and rifles. Now I'm not sure I want to keep them or add to them if this is the treatment I'm going to receive. Please return my case.

Sincerely,

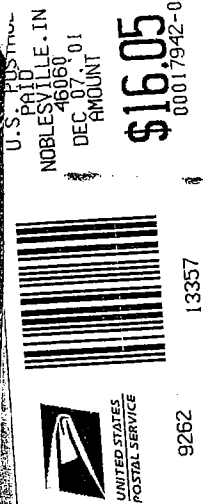

Miko Musselman
