

Sirs:

4-15-93

I purchased this rifle in 1971 (ppr), new. About 1980, the rifle fired when the safety was released. It went into your repair dept. and I have had trouble with it until now. The rifle ~~is~~ fired accidentally again. This time it was on the second shot to a deer. I fired once at a running deer, ejected the casing, chambered another and it fired before I could touch the trigger.

I love this rifle but don't trust it anymore.

Please repair and send back.

Sincerely, Jim Mommser
