

Jerry,

As per our conversation on Mon.,
June 11, I am shipping you one Model 70.
BOL - 30:06. I would like a new bolt.
lock safety installed on the gun. One that
allows the bolt to be opened with the
safety still engaged.

On three occasions over the past
year the gun has fired after loading a
shell and closing the action. This situation
cannot be safe, please check whatever else
could be possibly causing this reaction in
the gun.

Thank you
Walt
