

8-29-90

Dear Sir,

I am sending my 700 REM. 270 CAL back for repairs. I am experiencing problems with my safe. After releasing my saftey five or six times, my firing pin goes off.

I called your service department on August 29, 1990. After explaining my problem, they suggested that I send my gun back for repairs.

As deer season is around the corner, and I am in a running deer shoot in October, I would appreciate if my gun could be repaired as soon as possible.

If I could be of any further help, please call me at (412) 628 - 7899 any time after 3:30 p.m.

Sincerely,

Mr. David Porter
