Re: Remington Model 700 Lefthand
Serial No. A6428840

To Whom It May Concern:

I purchased my gun used in 1979. During the 1981 hunting season I experienced a malfunction when I pushed off the safety, the gun fired. I took the gun to a gunsmith who could not find anything wrong with it.

Last year the gun fired twice when I pushed the safety off. My finger was not near the trigger.

I find this situation very unsettling. Please repair. Your prompt attention to this situation will be very much appreciated.

Sincerely,

Kenneth L. Porter
