Dear Remington Fire Arm,

This 30-06 I'm sending
is very dangerous. It fires
sometimes when the safety is
taken off without the finger
being on the trigger. It has
happened to me on three
different occasions. On one
occasion, I was very lucky
that my son was not ~~shot~~
shot. Then I watched 60
minutes several weeks ago,
and they had a program
on the exact rifle doing
exactly what my rifle
is doing. That is when
I realized that there is
something seriously wrong
with my rifle. If the
matter can't be corrected
please send me a new rifle.

Thank you
Mr. John Ponsoll
