

Imodium A-D

5/31/94

Remington Arms

Service Dept.

Sirs; My Rifle Model 700
Sn. B6521567 is having
the problem listed below.
On several occasions I
have pulled the trigger, and
it has not fired seconds
later it will fire even
if my finger is not on the
trigger. Please check the
reason why it does that.
I am shipping the Rifle
complete. I took some
parts apart to make room
in the box.

p.s. most of the time it does
good.

Available in Caplets and Liquid
