

Dear Sirs

I am returning this rifle for the second time, which is unsafe to shoot. On third day of buck season the rifle just clicked. I thought the chamber was empty, but when I opened the bolt there was a bullet in chamber. The firing pin never hit the primer on the bullet.

On second occasion when I opened the bolt up the bullet that was in the chamber went off. That could have been a fatal accident.

On third occasion I shot at a doe. The gun did fire, I missed deer when I went to put next shell in bolt jammed up I couldn't close it.

I am very dissatisfied with this rifle is working. If the problem cannot be corrected, I would like a new one to replace this one. This is not your problem when I bought this rifle at the K-Mart store in Walnutport, they switched the bolts

in this rifle. That is why I had to
sent it back to you people the first
time. When you find out what
the problem is please send me a
letter or call me at (215) 767-7654
