Model: 700 LH 30.06

Serial #: E6312694

Date of Purchase: 9-3-97
(If available, please attach a copy of the proof of purchase.)

FROM DAY ONE I've had problems w/

Please describe the problem you are having with your firearm: *FIRE ARM. The bolt has always been very stiff. Extremely difficult to chamber a shell. I was told it would take some time to work in. Then I did something stupid. In my basement, using a ~~and~~ different shell manu. I tried to chamber a live shell - with the safety on! When I brought the bolt forward the gun went off into & thru the wall in my basement - below the ground line. No body was injured. I brought the gun to my gun smith who could not find anything noticeably wrong. However he subsequently stopped working on Remington firearms. Then the program on T.V. by I believe Dan Rather showing that someone was killed when this gun fired when I should not have... Just as mine did* → *over*
