Remington Arms

attn: Customer Service

I have a customer with a Model 700BDL,
in .243 caliber. It occasionally fires
when the safety is released. Is there an
adjustment I can make? If so, then
please FAX some instructions.

If this is covered under warranty then
who is your nearest warranty repair
dealer? Will my customer need an
authorization # from Remington?

His serial # is B6267134

Thanks,

Guy Edwards
