Enclosed please find a Remington 700 BDL, 7mm magnum, Serial # 6562131 (3 pieces gun-bolt-trigger assembly).

The initial problem encountered was the gun fired when the bolt was being closed. During inspection of the problem the gun was improperly disassembled, removing the 3 trigger adjustment screws prior to removal of the sear spring. Reassembling then damaged the sear spring.

Please replace the sear spring, reassemble, adjust trigger springs, and check for proper functioning.

Thank You  
Francis M. Keeler
