

Dear Remington Arms.

On Two different occasions -
I have had trouble with my 3006 Rifle.
One time I tried to push the Bolt
Forward while target practicing. He seemed
to be jammed! It seems that if the
safety position was partially on, it will
have on jam. After working with
Bolt, pushing and pulling with pressure
slamming the bolt forward the gun
went off!! Lucky I had it pointed
upward. The second occasion while
hunting in the mountains, I laid
the gun down across the front
seat of my truck for only a moment
checking to make sure the gun
was all the way on safety.
Of what happened on the first occasion
kind of jamming between safety & fire.
I was going to flip it on fire then
back on to safety again, to be sure
the gun was all the way on
safety, the gun went off going
through not only my truck but a
fellow hunter's truck.!!! Boy was
lucky no one was around, I'll
over.

My Blessings! My Friend Ronnie Bell
of Salem VA. sent his 30.06 to Remington
ALSO. Remington replaced the safety
on his Rifle, One time he had a
jamming problem. I called Remington
to see if they have had a recall.
No. One could tell me that they
have had one. I love my Remington
Bolt. 30.06 I also have a model 7,
Auto. And a lot of my friends
in our hunt club has Remington.
I thought seriously about selling
my Rifle because of this problem
But got to thinking. That it sure would
be scary if someone less cautious than
I, would have this gun, Ah. I would
been standing around it when the
has happened! So. I am sending it to Rem.
instead of a micky mouse gun shop

Please let me know if you can
convert my safety over to the A
style. But most of all was to
my problem, or is it something
else. Secondly if you could check
— next page —

out my gun completely. please
Let me know if anything is
is wrong AN. IF it would be
A large expense. I already have
A lot of money tied up in this gun
Because of the repair bill not only
my truck but also the other truck
as well. the notches I would
to put in my stock would rather
be because of Big Bucks instead
killing ~~two~~ Ford Trucks my friend
told me AN tell me they will get 11
Big game tags for Dodge & Chevy
Next. Ha Ha. Please call. I work

During the Day as a salesmen.
my number is 1-800-476-8821 please
leave a message if I am not in.
As to who I need to contact by
number & person doing work

P.S. Due to ^{Repair} cost. I would like to check on
in the cost of having the gun re-blued
Depending on repair. Tell AN cost of Reblue

THANKS VERY MUCH
