Ilion, New York 13357

Dear Sir or Madam:

I am enclosing my 7MM Remington for repair. **The Problem is the gun will sometimes discharge when you put the bolt down, after loading it.** Last week while hunting I loaded the gun, at that time I put a round in the chamber, then put the bolt down and the bullet fired. I in no way touched the trigger and there was no problem with the bullets. I later checked it again unloaded and it did the same thing again.

Enclosed is the weapon and the bolt also please repair it as I have had this one a long time and would like to be able to use it again. My telephone number is Area (407) 773-9200. Fax (407) 773-9944. E-mail RS19JS@AOL.Com.

Sincerely,

Ronald L. Sammons
