

11-10-98

DEAR DENNIS,

This letter is A follow-up of OUR CONVERSATION ON 11-10-98.

ON 11-9-98 while Attempting to Site in my 7mm Remington and placing the bullet in the chamber, the gun went off when I went to close the bolt. This sent the bolt backward into my Right hand. SEVERE contusions were placed on my Right thumb and wrist. I went to the E.D. @ Jt. Twp. Dist. Memorial Hospital for X-rays and have it EXAMINED. I am Awaiting the Radiologist Report of the X-ray AS this was after his READING hours.

After checking Records, this gun WAS purchased Sept. of 1996 AND HAS had less than 1 Box of shells fired. I use Remington 7mm REMAG Ammunition 150gr. CORE-LOKT. PTD SOFT-PT #8 7mm 2.

I WAS NOT ABLE to REMOVE my scope mount. THANK you for your IMMEDIATE Attention.

BERRY G. SILVER
