DENNIS SANITA
REMINGTON ARMS
14 HOEFLER ST
ILION

NY 13357

chambered for 7mm

In proceeding with the operation of loading this firearm, with the safety in the on position, I was able to pull the bolt out of the weapon without pressing the bolt release. Since my phone complaint with you on this matter I have not been able to make the weapon repeat the malfunction as it had done so any times before. Please go all over the mechanics of this firearm and make sure it is safe and in working order. If this weapon is returned me I am trading it in because I have never been so dissatisfied with a firearm or manufacturer. Feel free to contact me if you have any further questions.
