To Whom it May Concern,

Enclosed is a Model 700, 222 Caliber Rifle, S/N 85875. I was advised by one of your instructors at an armorer class to send the rifle in for factory repair. The Rifle sometimes fires by itself right after you close the bolt with a round in the chamber making very unsafe. The instructor thought that maybe it was a bad trigger assembly. If you need to contact me feel free to call me at work or you can E-Mail me, what ever is easiest for you. Thanks for your help with this.
