Customer wrote a letter & Anne Harper brought it over to Product Service Dept on 11/17/10. He stated that he has a M/700. He saw the CNBC show & our website. He stated that while he was hunting 3 yrs ago the gun went off twice. He was then unloading the gun in his home & it fired. Shot a hole in 2 walls & a chair. He stated that he is not interested in getting involved in any legal issues. He just wants his rifle fixed. df

Ref: # 5134

Dear Mr. Francis,

Enclosed is a prepaid UPS shipping label to cover shipment of your firearm to our factory for examination.

Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

Madison, NC 27025-0700

Gentlemen,

I am writing regarding my Model 700 firearm. Yes, I did see the television show and yes I did review your website, etc. I am not interested in causing problems; I am interested in getting my firearm taken care of.

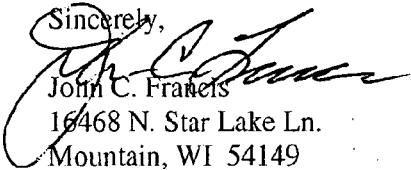

I own a Model 700, .270, number A6789872.

3 years ago while I was unloading the gun after a day of hunting it fired when the safety was moved to facilitate the unloading process. Luckily the gun was pointed to the ground and no one was injured. My son assumed that it was my fault, but I was quite sure that I had practiced proper safety. A second time I was walking in the woods and in preparation to taking a shot, removed the safety and once again it fired, once again into the ground. I was certain that I had not done anything to cause this to happen. I took the gun home and did a proper cleaning and made sure that the action was smooth without any hang-ups. I loaded and unloaded the gun to make sure all was functioning properly. While the gun was flat on a table and I was preparing to unload and case the weapon, it fired, sending a bullet through 2 walls and a chair, before coming to rest in the corner of my gun cabinet.

I took the gun to the gunsmith to be checked out and was told that the firing pin was now damaged because of the misfiring and the bolt would need to be replaced. This is a costly measure and while the gun is a favorite it is prohibitive for me to spend that money.

After watching the program and recalling the events that have happened to me it all seems pretty convenient to blame others. I am not interested in getting involved in any legal issues, I would just like to get my gun back to a useable condition and be able to use it safely. I have a model 870 and a model 742 and never had problems. I would appreciate this being taken care of.

Sincerely,

John C. Francis
