Re: Four Remington Models 700 BDL

Dear Sir:

Enclosed, along with a check in the amount of \$80.00, are four Remington Model 700 BDL rifles, whose caliber and serial numbers are as follows.

6mm  
.30-06  
7mm magnum  
.270

Serial Number: 6515107

These are returned to you pursuant to the Remington safety replacement program. I telephoned the company on October 18, 2010, and their representative, Chris, directed that I ship the firearms to you as their authorized agent and service center for repair. These firearms were manufactured prior to 1982 and on each of them I have had problems with the firing pin dropping when the safety is turned off. I have enclosed copies of recent legal action regarding this issue. It is well documented. I have been a dedicated Remington customer for 30 years and would appreciate an honest evaluation and correction of the safety problems. I expect them to be made safe by insertion of the new XD triggers. If there is some reasonable charge for that please let me know. I'd rather pay a few bucks and have confidence in the safety mechanism than lose a child, a friend or property to a misfire. I understand Remington's position that safety, i.e., muzzle control is of utmost importance. One of my best childhood friends grew up fatherless because his dad was killed by a freak ricochet on a shooting range. No amount of diligence can protect one completely from an unsafe product.

The .270 and the 7mm magnum have never been fired.

If you have any questions, please contact me.

Sincerely,

  
Jonathan W. Shirley
