Dear Mr. Sprangers,

You will receive a pre-paid shipping label in a separate email within 24-48 hours. Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

Dear Mr. Sprangers,

We would like to have the firearm come into our Product Services Department at our factory for examination. We will send you a pre-paid shipping label for UPS to have the firearm come in. I will also include a form that you can fill out to let the examiner know exactly what happened, when this occurred, and what you are expecting.

Sincerely,
Dell

To Whom It Concerns,

Sirs, about 2 weeks ago as I was going to site in my Remington 700. I pushed the safety from on position to fire position and the gun fired without pulling the trigger. Then I did the same procedure two more times and it did the same thing. The next four rounds when I chambered the round the gun fired without pulling the trigger or moving the safety. Then I came home and just cocked the empty gun and pushed the bolt down and it fired. Then I did two more times and it did the same thing.

I'm 63 years old, I've been trained in the United States Army, I've hunted since I was 8 years old so I don't want any garbage about not being experienced on handling guns. I also helped train students for hunter safety courses.

This is my 30-06, will my 300 Mag. do the same thing? They are both 700s. I now refuse to use the 30-06 in the shape it is in and refuse to take it hunting. I expect a reply from you on how you are going to repair this gun for me. Will be waiting to hear from you.
