Customer sent in a letter. He stated that on 11/11/10 he was hunting for bull elk. He returned to his hse around 9:30am. He put his M/700 in the passenger seat of his truck & went into house & got truck keys. He drove the truck to a gate, had some coffee & listened to the news. He noticed that his rifle was still loaded & the bolt was closed. He placed the rifle onto the console w/right arm and then released the safety w/thumb & 1st finger. The gun fired, shooting a hole through the passenger door of truck. He stated it cost him \$2,395 to get door repaired. He feels he should be compensated for that amt & the rifle should be fixed. df

Dear Mr. Abbas,

Number: **A6358425**

Model: **700**

RE00227600

Enclosed is a prepaid UPS shipping label to cover shipment of your firearm to our factory for examination.

Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

TO: REMINGTON ARMS
Dec. 16, 2010

On Nov. 11, 2010 I decided to walk to the lower field in search of a bull elk. I returned to the house about 9:30 A.M. I place my Remington model 700 rifle in the passenger of my Dodge truck, barrel down, and went into the house to get my truck keys.

I drove my pick-up to the gate, overlooking the bottom field. I decided to have some coffee and listen to the news.

After a couple of minutes I noticed that my rifle still had a bullet in the chamber and the bolt was closed.

I am 61 years old and I never ever place a loaded gun in a vehicle..(except this once)

I placed the rifle onto the console with my right arm; I then released the safety with my thumb and first finger. At this moment the gun fired, shooting a hole through the passenger door of my truck. My hand was not near the trigger. I sat in shock for a minute, not believing what had just happened.

I now realized I had a bullet hole through my door and sore ribs from the kick of the gun. Thank God, no one was with me this day,

I recently got my truck out of the shop; it cost \$2395.00 to get the door repaired.

I believe I should be compensated for this amount, and my rifle should be fixed so it will never fire again, until the trigger is pulled.

I have not used it since the day it fired without pulling the trigger, and do not plan to until it is safe.

I can't sell it, knowing what I know about it, unless someone would like to buy it for testing purposes.

Thank You. I wait your reply.
