Please describe your problem: Returning the firearms in response to Remington's Bolt Lock Safety Program and prefer to have the bolt lock removed and receive the safety certificate. NOTE - a relative borrowed this rifle from me and reported a discharge upon chambering a round. This occurred about 20 years ago and I have always dismissed it as improper handling since it has never happened to me. After reading some of the information available, I now think it is possible that it did happen as described. <i>could not duplicate concern T.A. DIRTY set screws altered. Rep me JPA, clean + rest fire under BLP for \$20.00 + ship.</i>
